## OFF GRID

### PROJECT FACILITY

Off grid project facilities have an equivalent off grid capacity of a 1400 square foot home.

When you rent this product, not only are you saving at least 80% of the fuel required to run a generator full time, but you are saving the extra cost of a generator rental as well.

Our team will deliver the facility to your site, set it up and provide a brief "How to" on what you can expect while renting this facility. The facility also comes with a satellite internet connection to provide a complete turnkey setup for your project office.
